Connecting to MT4

Signal and select the MT4 account

5

Once your MT4 account is linked successfully, it will display 4 tabs on bottom

Three Copy Strategies

- **1. Fixed Size** = all copy trades are fixed to one size
 - E.g., If the size is set to 0.1 lot.
 - The signal provider places 10 lots of XAUUSD; the copier will place 0.1 lot of XAUUSD+
 - The signal provider places 0.01 lot of XAUUSD; the copier will still place 0.1 lot of XAUUSD+

- All copy trades are fixed to one size Ensure no trades are missed
 - Any open trades will be copied

Three Copy Strategies

- 2. Mirror Master Size = copy master trade size irrespective of account size
 - E.g., The signal provider places 10 lots of XAUUSD; the copier will place 10 lots of XAUUSD+
 - The signal provider places 0.01 lot of XAUUSD; the copier will place 0.01 lot of XAUUSD+

Three Copy Strategies

- **3. Proportional by Equity** = the trade size is proportional to account equity. The copier can reduce or amplify their exposure to the size of trades
 - E.g., If the proportion is set to 2 and the signal provider's equity is US\$100, then the copier's equity will be AU\$1000
 - If the signal provider uses a US\$5 margin to open a trade, the copier will use an AU\$100 margin to open a position of the same symbol.
 - 100 = (5 / 100) * 2 * 1000
 - (The signal provider's used margin for this trade/ The signal provider's equity) * proportion * The copier's equity
